The Analyst will be a member of the US Quantis team and will interact with the other team members based in Canada and Europe. The Analyst will be in charge of conducting and delivering Life Cycle Assessment projects for clients with the goal of improving their understanding of their environmental impact and helping them make key decisions and take action to improve environmental performance.

Job duties and accountabilities:

Reporting to the US Director of Quantis, the Analyst will be responsible for:

- Conducting life cycle assessments
- Assessing corporate environmental sustainability metrics
- Consulting with clients to assist them in their understanding and implementation
- Collecting critical data from clients as well as from other available sources
- Preparing reports and presentations
- Developing unique solutions
- Supporting software customers

Critical Qualifications and Competences:

- One to ten years experience in performing, managing, interpreting and/or communicating of Life Cycle Assessment (LCA) and/or related topics whether from an academic, industry or other background
- Ability to structure own work and self-motivated
- Sound problem solving skills
- Scientific expertise
- Ability to communicate effectively and build relationships with clients

Preferred qualifications

- Previous experience in the consulting business

About Quantis

Quantis offers comprehensive, high impact solutions for organizations that are socially responsible, environmentally accountable, and understand the stakes at hand. With a team of dedicated analysts and with expertise ranging from life cycle assessment studies to consulting and business software, Quantis helps today's and tomorrow's sustainability leaders walk the talk. Quantis works with companies, governments and others to identify decisions and actions that promote a more sustainable world. Our focus is on a quantitative approach to measuring and managing environmental performance, believing that the best science is a necessary to support today's crucial decisions regarding environmental sustainability. Quan-

tis' global team of 30 LCA experts mixes a background of leading scientific work with approaches that meet the needs of today's key decision makers.

Quantis offers a dynamic work environment and opportunities for professional growth. Salaries will be determined based on levels of experience, for which a wide range of options will be considered. Competitive salary, health, dental and optical insurance, retirement plan and a generous holiday schedule are offered. Work will primarily take place at the Salem, Massachusetts office, with occasional travel.

Candidates should submit a résumé or CV and any other materials by email to info.usa@quantis-intl.com. Candidates will be evaluated and/or interviewed on an ongoing basis.
