

Footprint reduction is your goal.  
How to achieve it?  
This is where we come in.

Quantis provides world-leading expertise in Life Cycle Assessment (LCA) and offers coherent, high impact solutions for organizations worldwide that are socially responsible, environmentally accountable and understand the stakes at hand. Offering tailor-made solutions, Quantis helps today's and tomorrow's sustainability leaders walk the talk.

## What can we do?

- LCA of products and services
- LCA of organizations
- Social LCA
- Carbon and water assessment footprinting
- Sustainable procurement
- Environmental strategy
- Software solutions
- LCA reviews
- LCA Training
- Ecodesign

## Why take a life cycle approach?

The Life Cycle Approach takes a complete view of your organization's sustainability: from taking into account, through LCA, the environmental impact from the supply chain to the end-of-life of your products and services.

By providing a big picture perspective, it can help to:

- Prioritize hot spots
- Improve environmental performance and save costs
- Manage risks in a changing environment
- Set goals and track performance
- Test scenarios to evaluate future changes
- Communicate results
- Measure carbon and water impact-footprints of your organization, products or services
- Place product footprints in the context of your company
- Go beyond carbon
